OBJECTIVE

To contribute as a Software Developer by leveraging my extensive experience, technical expertise, and problem-solving skills to deliver high-quality, scalable, and maintainable web applications that meet functional and design requirements.

EDUCATION

Tertiary Education | Colegio De Sta. Teresa De Avila
Bachelor of Science in Information Technology (BSIT)
2013 – 2017

Secondary Education | Manuel Luiz Quezon High School
2010 – 2013

Primary Education | Marcelo H. Del Pilar Elementary School
2005 – 2010

SKILLS

Languages: Java, Visual Basic .NET and PHP

Frontend Technologies: Javascript, JQuery, Sencha Ext JS, Syncfusion EJ2 (ES5), React JS, Angular, JSP, HTML, CSS and Bootstrap

Backend Technologies: Spring, Spring MVC, Spring Boot, Spring Cloud, REST, Struts, Hibernate, Quartz Job Scheduler, Crystal Report and Redis.

Build and CI/CD Tools: Gitlab, Maven and Jenkins

Databases: MySQL, MSSQL and Oracle

Application Servers: Tomcat, Jboss and Web Logic

Version Control and Issue Tracking: JIRA, GIT and SVN (Tortoise)

Operating System: Windows and Unix

EXPERIENCE

Sr. Full Stack Developer | Anagenesis Inc.
JUNE 2025 – PRESENT

Duties and Responsibilities:

- Continued development of an enterprise betting and live streaming platform following a company transition from the previous vendor.
- Contributed to upgrading both desktop and mobile web versions of the platform, including migration from Angular 8 to Angular 18 and frontend modernization.
- Enhanced and maintained a web application for both desktop and mobile platforms, improving performance, scalability, and user experience.
- Developed REST APIs for new features, promotions, and real-time system functionality.
- Collaborated with UI/UX and mobile teams to ensure consistent cross-platform implementation.

Projects:

- **Enterprise Betting System (Continued)**
 - A cross-platform real-time betting and live casino platform supporting multiple sports markets, including football, basketball, tennis, and esports, with high concurrent user traffic and live data processing.**Tools and Technologies:** Java 8, Angular 18, Spring, Google Guice, Redis, Redis Pub/Sub, MSSQL, Jenkins, GIT, Gitlab, JIRA and Unix.
- **Live Streaming & Sports Platform (Mobile Web App) (Continued)**
 - A mobile-first web platform delivering real-time live streaming of sports and esports events, including football, basketball, tennis, and esports.**Tools and Technologies:** Java 17, Angular 17, Spring Boot, Spring Cloud, Mockito, Redis, Redis Pub/Sub, PostgreSQL, Jenkins, GIT, Gitlab, JIRA, Maven and Unix.

Sr. Full Stack Developer | Cybilltek Software Inc.

MARCH 2024 – JUNE 2025

Duties and Responsibilities:

- Collaborated with UI/UX team to translate designs into functional web and mobile feature.
- Developed REST APIs for new features and promotions, including API documentation and cross-platform integration with mobile apps
- Built full-stack functionality for web and mobile applications, translating Business Requirement Specifications (BRS/BRD) into production-ready code
- Implemented and enhanced features for a cross-platform betting application, improving user experience and system performance.
- Diagnosed and resolved defects across QA, UAT, pre-live, and production environments
- Follow Agile practices with daily stand-ups to discuss progress, blockers, and tasks for the day, ensuring transparency and continuous team alignment.
- Participate in sprint planning, reviews, and retrospectives to improve team performance and development processes.

Projects:

- **Enterprise Betting System**
 - A cross-platform real-time betting and live casino platform supporting multiple sports markets, including football, basketball, tennis, and esports, with high concurrent user traffic and live data processing.**Tools and Technologies:** Java 8, Angular 7, Spring, Google Guice, Redis, Redis Pub/Sub, MSSQL, Jenkins, GIT, Gitlab, JIRA and Unix.
- **Live Streaming & Sports Platform (Mobile Web App)**
 - A mobile-first web platform delivering real-time live streaming of sports and esports events, including football, basketball, tennis, and esports.**Tools and Technologies:** Java 17, Angular 17, Spring Boot, Spring Cloud, Mockito, Redis, Redis Pub/Sub, PostgreSQL, Jenkins, GIT, Gitlab, JIRA, Maven and Unix.

Analyst Programmer | Novasolutions Philippine Inc.

MARCH 2022 – MARCH 2024

Duties and Responsibilities:

- Developed full-stack web application features (UI, frontend, and backend) based on User Requirements Specification (URS)
- Translated Functional Design Specifications (FDS) into high-quality, production-ready code

- Enhanced and optimized complex SQL queries, reducing response times and improving user experience for search and reporting functions.
- Diagnosed and resolved defects across QA, SIT, UAT, and production environments
- Enhanced system functionality by developing new features for the e-Submission platform
- Participated in the full Software Development Life Cycle (SDLC), from development to production deployment.

Projects:

- **GENIE (Singapore E-Government System)**

- An end-to-end paperless case management system under the Legal Aid Bureau (Ministry of Law, Singapore) that digitizes and streamlines legal aid application and case handling processes.
- Supports electronic management of legal cases, including registration, document storage, workflow processing, and case tracking in a secure environment.

Tools and Technologies: Java, Sencha Ext JS (3.4.0), JSP, Struts 2, EJB, Hibernate 5, Quartz 2.3, MSSQL, Elixir, Apache Solr, SVN (Tortoise), JIRA and Maven.

- **ERA – Enterprise Registry and Archival (Singapore E-Government – LTA)**

- An e-Government system under the Land Transport Authority (LTA) of Singapore for managing and archiving vehicle registration records, engineering drawings, and official transport documentation.
- Supports vehicle registration workflows, including document processing and plate issuance, serving as Singapore's equivalent of a national vehicle registration system (similar in function to LTO in the Philippines)

Tools and Technologies: Java, Sencha Ext JS (3.4.0), JSP, Struts 2, Hibernate 3, Quartz 1.6, Oracle, Elixir, Apache Solr, SVN (Tortoise), JIRA and Maven.

- **CORENET 2.0 (Singapore E-Government Construction System)**

- A national e-Government platform in Singapore for electronic submission and processing of building and construction-related applications and documents in a secure online environment.
- Enables Qualified Professionals to submit, track, and manage regulatory approval workflows for construction and development projects through a centralized system

Tools and Technologies: Java, React JS, JSP, Spring MVC, Spring 5, Hibernate 5, Quartz 2.3, MSSQL, Crystal Report 2016, SVN (Tortoise), JIRA and Maven.

Programmer | Novasolutions Philippine Inc.

MARCH 2019 – MARCH 2022

Duties and Responsibilities:

- Contributed to the ground-up development and project initialization of a web-based e-Submission system
- Developed full-stack web application features (UI, frontend, and backend) based on User Requirements Specification (URS)
- Translated Functional Design Specifications (FDS) into high-quality, production-ready code
- Enhanced system functionality by developing new features for the e-Submission platform
- Diagnosed and resolved defects across QA, SIT, UAT, and production environments
- Supported SIT database management, monitoring, and maintenance for system stability
- Participated in the full Software Development Life Cycle (SDLC), from development to production deployment

Projects:

- **URADAX 2.0 (Singapore E-Government – Urban Redevelopment Authority)**

- An e-Government system under the Urban Redevelopment Authority (URA) of Singapore that supports the processing and management of land use and development applications for occupancy and planning approvals.
 - Facilitates workflow-based submission, review, and approval of development-related applications within Singapore's land use regulatory framework
- Tools and Technologies:** Java, Syncfusion EJ2 (ES5), JSP, Spring MVC, Spring 5, Hibernate 5, Quartz 2.3, JBoss BPM Suite, Oracle, Crystal Report 2016, SVN (Tortoise), JIRA and Maven.

Junior Programmer | Novasolutions Philippine Inc.

JUNE 2017 – JUNE 2019

Duties and Responsibilities:

- Developed full-stack web application features (UI, frontend, and backend) based on User Requirements Specification (URS)
- Diagnosed and resolved defects across QA, SIT, UAT, and production environment.
- Enhanced system functionality by developing new features in an in-house Document Management System
- Participated in tech revamp, migrating from Struts to Spring MVC and Oracle to MSSQL

Projects:

- **PAVO E-Collaboration (Document Management System)**
 - A document management system used for handling employee leave applications, where requests are approved or disapproved by authorized personnel. It is also used for storing important project-related documents such as Project Development Guidelines, User Requirements Specification (URS), Functional Design Specification (FDS), and environment setup documentation.

Tools and Technologies: Java, Sencha Ext JS (3.4.0), JSP, Struts 2, Hibernate 3, Quartz 2.3, MSSQL, Elixir, Apache Solr, Tomcat, SVN (Tortoise), JIRA and Maven.

TRAININGS AND SEMINARS ATTENDED

- Understanding Beyond Web Development – February 2017
- Java EE Training (Struts, Hibernate, Spring MVC Framework) – July 2017
- Object Oriented Programming - Basics to Advance (Java OOP) – September 2022
- Functional Programming + Lambdas, Method References, Streams – September 2022
- Java Collections Framework + Generics, Lambdas & Stream API – September 2022

AWARDS

OT Bayani | Novasolutions Phillipine Inc.

December 2018

- Recognized for showing dedication by working even after work hours.
